Belongg is a social venture that promotes **diversity and inclusion** in cities, societies and organisations by using a community-based approach to provide discrimination-free services to those who face bias due to their identity. Belongg curates knowledge resources and conversations focused on intersectionality and global development.

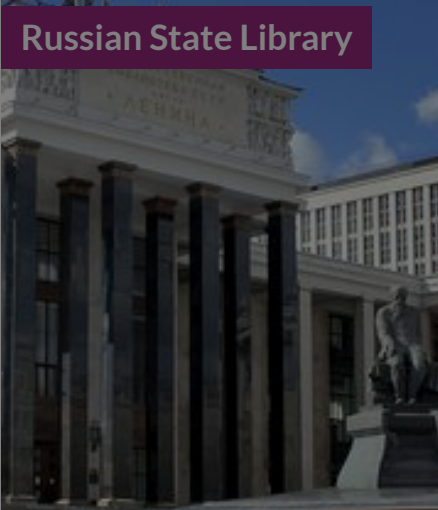

Their core community-building efforts revolve around **The Belongg Literature Collective**, which is focused on bringing carefully **curated literature on gender, feminism, sexuality, race, ethnicity, caste, disability, religion, and bias** to urban communities across India and globally. As a part of the collective, Belongg curates periodic **book readings, an annual Literature Festival focused on diversity and inclusion, and also a children's book club** focused on inclusive books.

Belongg also runs a network of “***Belongg Libraries***” which seek to be unique cultural spaces focused on promoting diversity and inclusion and bring together a combination of a local lending library, regular book readings, author events, and even contests all focused on different aspects of diversity and inclusion.
