ANOUNCEMENT

The international project “Cardboardia” is looking for the architects of its Science Town and the personages of the project for those, who will arrange their everyday life. The best suggestions will be chosen in competition. There is a crucial need for cardboard houses, sculptures and benches.

Our Mayor is dreaming about spacious and enlightened City Hall, while the Tyran like monuments, and for this time is crazy about cardboard machinery. The Chief Architect has plenty of plans about streets, squares and markets. And curator of competition already found international

experts for collaboration in construction and co-researching of cardboard potential.

And don't think that it is just a game. We are extremely serious. Just think: the director of MOMA's design and architecture department believes that the paper cup is more important invention then the one more Ferrari car!
